

# NEON and INDICATOR Lamps

Siemens Neon discharge lamps are manufactured in two types—lighting and indicator. Neon Lighting Lamps provide an economical source of illumination where dim lighting is continuously required, such as night-lights in nurseries, sick-rooms, etc.

Neon Indicator Lamps are specially small diameter lamps for use as indicators on switchboards, electric cookers, etc., to provide a visual indication that a circuit is "LIVE".

NEON							
Type	Watts	Approximate Dimensions				Cap	Price
		Length		Diameter			
		mm.	ins.	mm.	ins.		200/220, 230/240 250/260 volts
Lighting III	5	115	4½	60	2⅜	B.C.	4s. 6d.
Indicator I13 I14	0.5	54	2⅛	18	⅜	S.B.C.	200/260 volts
	0.5	56	2⅞	25	1⅞	B.C.	4s. 0d. 4s. 0d.
NEON CRUCIFORM							
Clear	5	mm. 104	ins. 4⅞	mm. 34	ins. 1⅜	B.C.	200/260 volts
							s. d. 7 6

SWITCHBOARD INDICATOR							
Type	Volts	Approximate Dimensions				Cap	Price
		Length		Diameter			
		mm.	ins.	mm.	ins.		s. d.
Clear	100/130 200/260	55	2⅞	28	1⅛	B.C.	2 6
Ext. Sprayed		55	2⅞	28	1⅛	B.C.	2 8
