

Transmitting Valve

TYPE T.15
(Nickel Electrodes)

2362A

(Approximate overall dimensions : 115 × 55 m/m.)

A transmitting valve, tested dissipating 15 watts at the anode, suitable for voltages up to 600.

Approximate Data :

Filament volts	5.5—6.0	Impedance (ohms)	50,000
Filament amperes	1.0	Amplification factor	25
Anode volts	600		

Code Word : IVJEA

Characteristic Curves of Average Valve.
