

# RHN 25 GM

## Internal Mirror Laser Tube

## Technical Data

---

|   |                                     |
|---|-------------------------------------|
| Output power 632.8 nm TEM <sub>00</sub> | 1.0 to 3.0 mW                       |
| Power stability ( $\Delta T \pm 1$ K)   | $\leq 5$ %                          |
| Noise/amplitude fluctuations            | $\leq 1.0$ % rms                    |
| Polarization                            | arbitrary                           |
| Beam diameter (at $1/e^2$ )             | 0.5 mm                              |
| Divergence (full angle)                 | 1.5 mrad                            |
| Longitudinal mode distance              | 640 MHz                             |
| Resonator configuration                 | symmetrical                         |
| Length                                  | 246 mm                              |
| Diameter                                | 34 mm                               |
| Gas discharge voltage                   | $1350 \pm 100$ V                    |
| Gas discharge current                   | 4.5 mA                              |
| Ignition voltage                        | 10.0 kV                             |
| Run-in period                           | $\leq 10$ min                       |
| Operating temperature range             | - 20 to + 40 °C ambient temperature |
| Storage temperature range               | - 40 to + 55 °C                     |
| Active life                             | typical 20,000 h gas discharge      |
| Passive life                            | > 5 years                           |
| Guarantee period                        | 1 year                              |
| Special feature                         | filling gas Ne <sup>20</sup>        |

## Order List

---

|             |               |
|-------------|---------------|
| Designation | Order No.     |
| RHN 25 GM   | 134013:001.27 |
