**BT17****MERCURY VAPOUR  
THYRATRON**

To be read in conjunction with the Rectifier and Thyratron Preamble.

**ABRIDGED DATA**

Mercury vapour thyratron for industrial control applications.

|                                      |     |        |
|--------------------------------------|-----|--------|
| Peak forward anode voltage . . . . . | 1.0 | kV max |
| Peak inverse anode voltage . . . . . | 1.5 | kV max |
| Peak anode current . . . . .         | 40  | A max  |
| Average anode current . . . . .      | 6.0 | A max  |

**GENERAL****Electrical**

|  |                                 |     |
|--|---------------------------------|-----|
| Cathode . . . . .                            | indirectly heated, oxide coated |     |
| Heater voltage . . . . .                     | 5.0                             | V   |
| Heater current . . . . .                     | 10.5                            | A   |
| Cathode pre-heating time (minimum) . . . . . | 5.0                             | min |
| Inter-electrode capacitances:                |                                 |     |
| grid to anode . . . . .                      | 6.0                             | pF  |
| grid to cathode . . . . .                    | 15                              | pF  |

**Mechanical**

|   |                             |
|---|-----------------------------|
| Overall length (excluding flexible leads) . . . | 10.250 inches (260.4mm) max |
| Overall diameter . . . . .                      | 3.157 inches (80.19mm) max  |
| Net weight . . . . .                            | 1.2 pounds (540g) approx    |
| Mounting position . . . . .                     | vertical, base down         |
| Connections . . . . .                           | flying leads                |

**Cooling**

natural

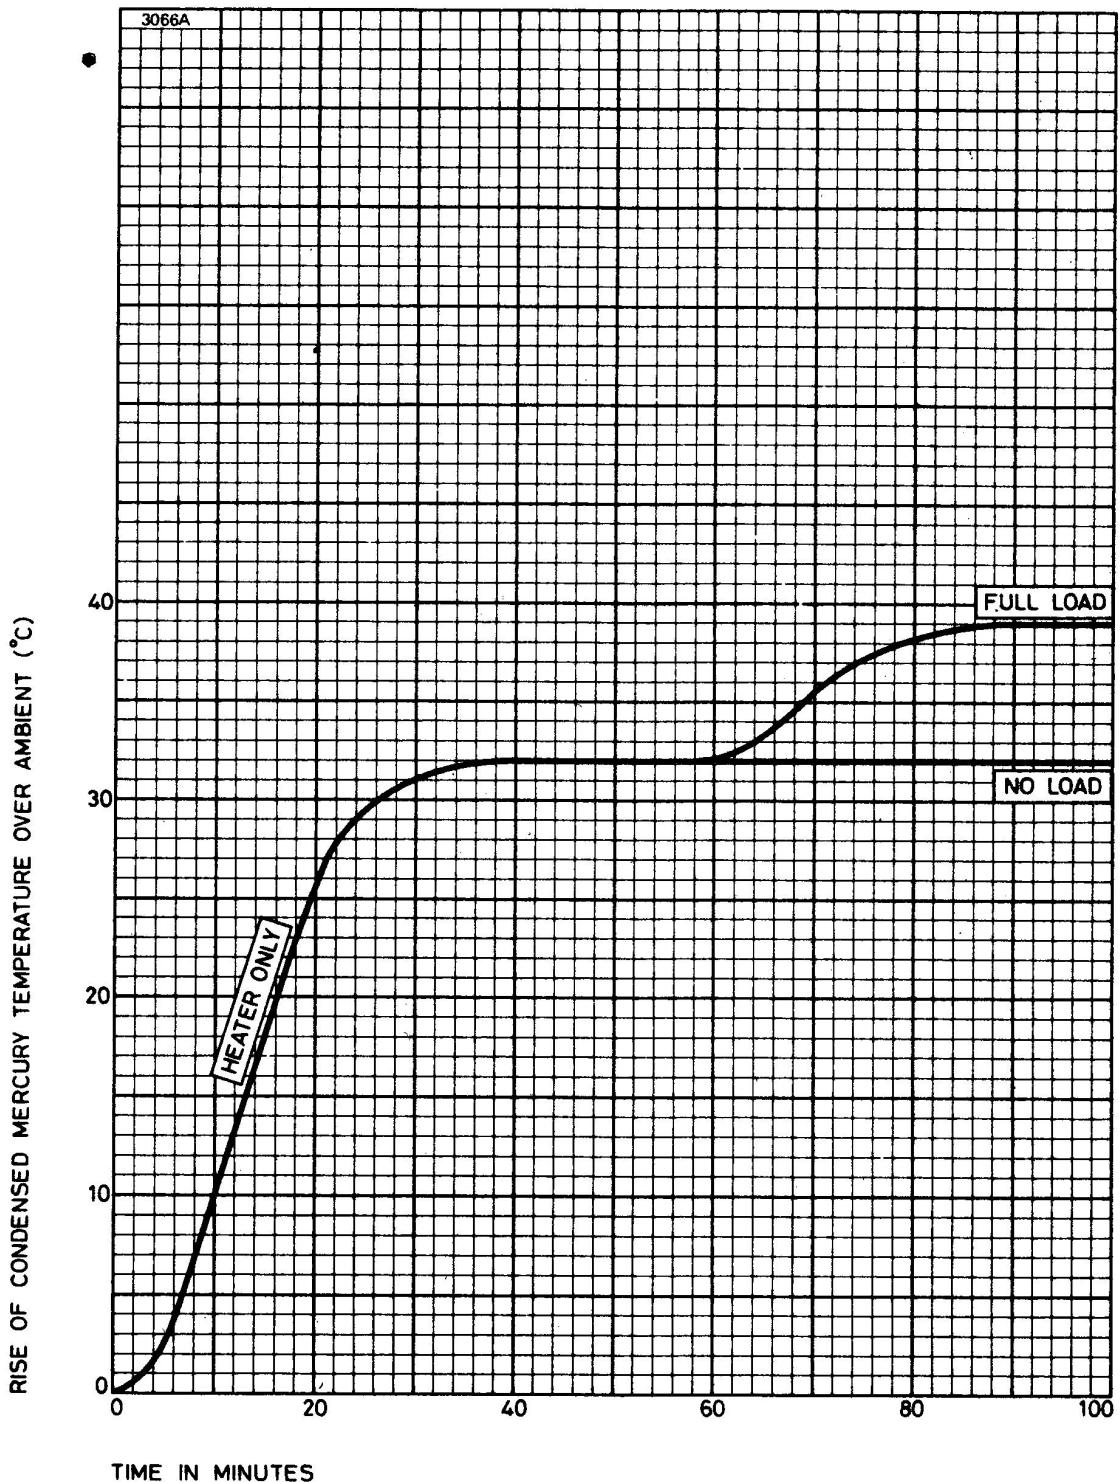

### **MAXIMUM AND MINIMUM RATINGS (Absolute values)**

|   | <b>Min</b> | <b>Max</b> |     |
|---|------------|------------|-----|
| Peak forward anode voltage . . . . .                        | —          | 1.0        | kV  |
| Peak inverse anode voltage . . . . .                        | —          | 1.5        | kV  |
| Peak anode current . . . . .                                | —          | 40         | A   |
| Average anode current<br>(averaging time 15s max) . . . . . | —          | 6.0        | A   |
| Fault anode current (peak) . . . . .                        | —          | 400        | A   |
| Duration of fault current . . . . .                         | —          | 0.1        | s   |
| Condensed mercury temperature . . . . .                     | 40         | 80         | °C  |
| Negative grid voltage:                                      |            |            |     |
| before conduction . . . . .                                 | —          | 500        | V   |
| during conduction . . . . .                                 | —          | 10         | V   |
| Average grid current . . . . .                              | —          | 250        | mA  |
| Recommended grid resistor . . . . .                         | 10         | 100        | kΩ  |
| Cathode pre-heating time . . . . .                          | 5.0        | —          | min |

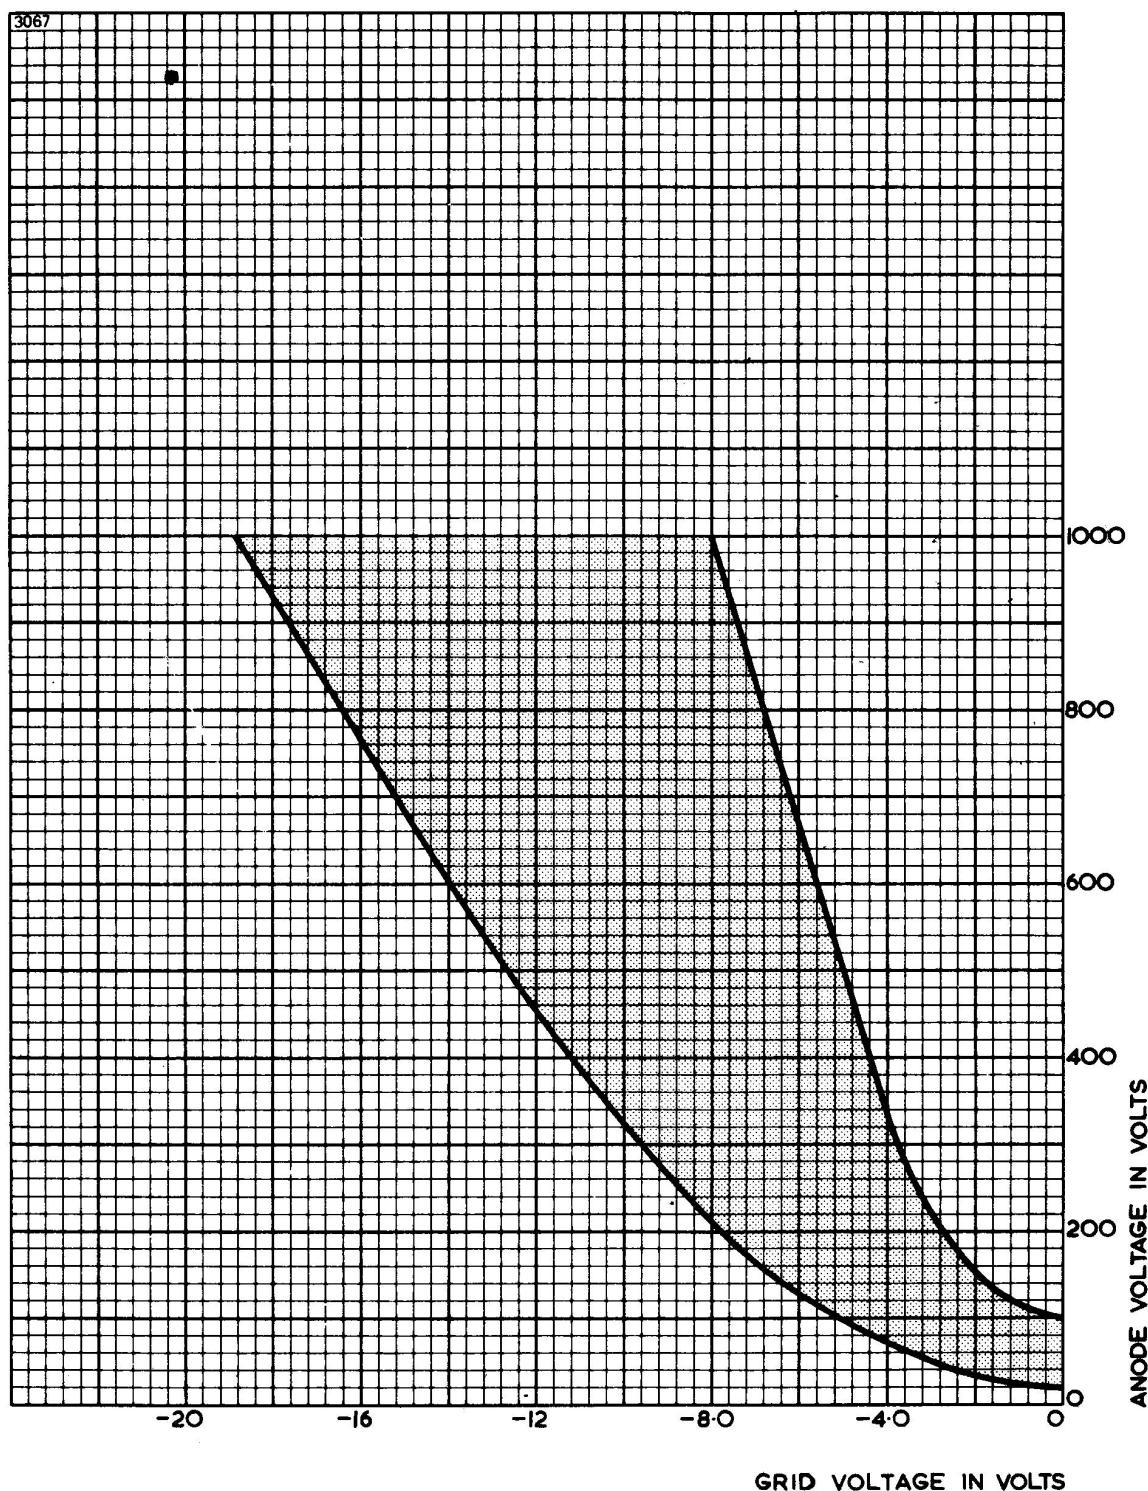

### **CHARACTERISTICS**

|                                     |     |           |
|-------------------------------------|-----|-----------|
| Voltage drop . . . . .              | 16  | V approx  |
| Ionisation time . . . . .           | 10  | μs approx |
| Recovery time . . . . .             | 1.0 | ms approx |
| Condensed mercury temperature rise: |     |           |
| at no load . . . . .                | 32  | °C approx |
| at full load . . . . .              | 39  | °C approx |

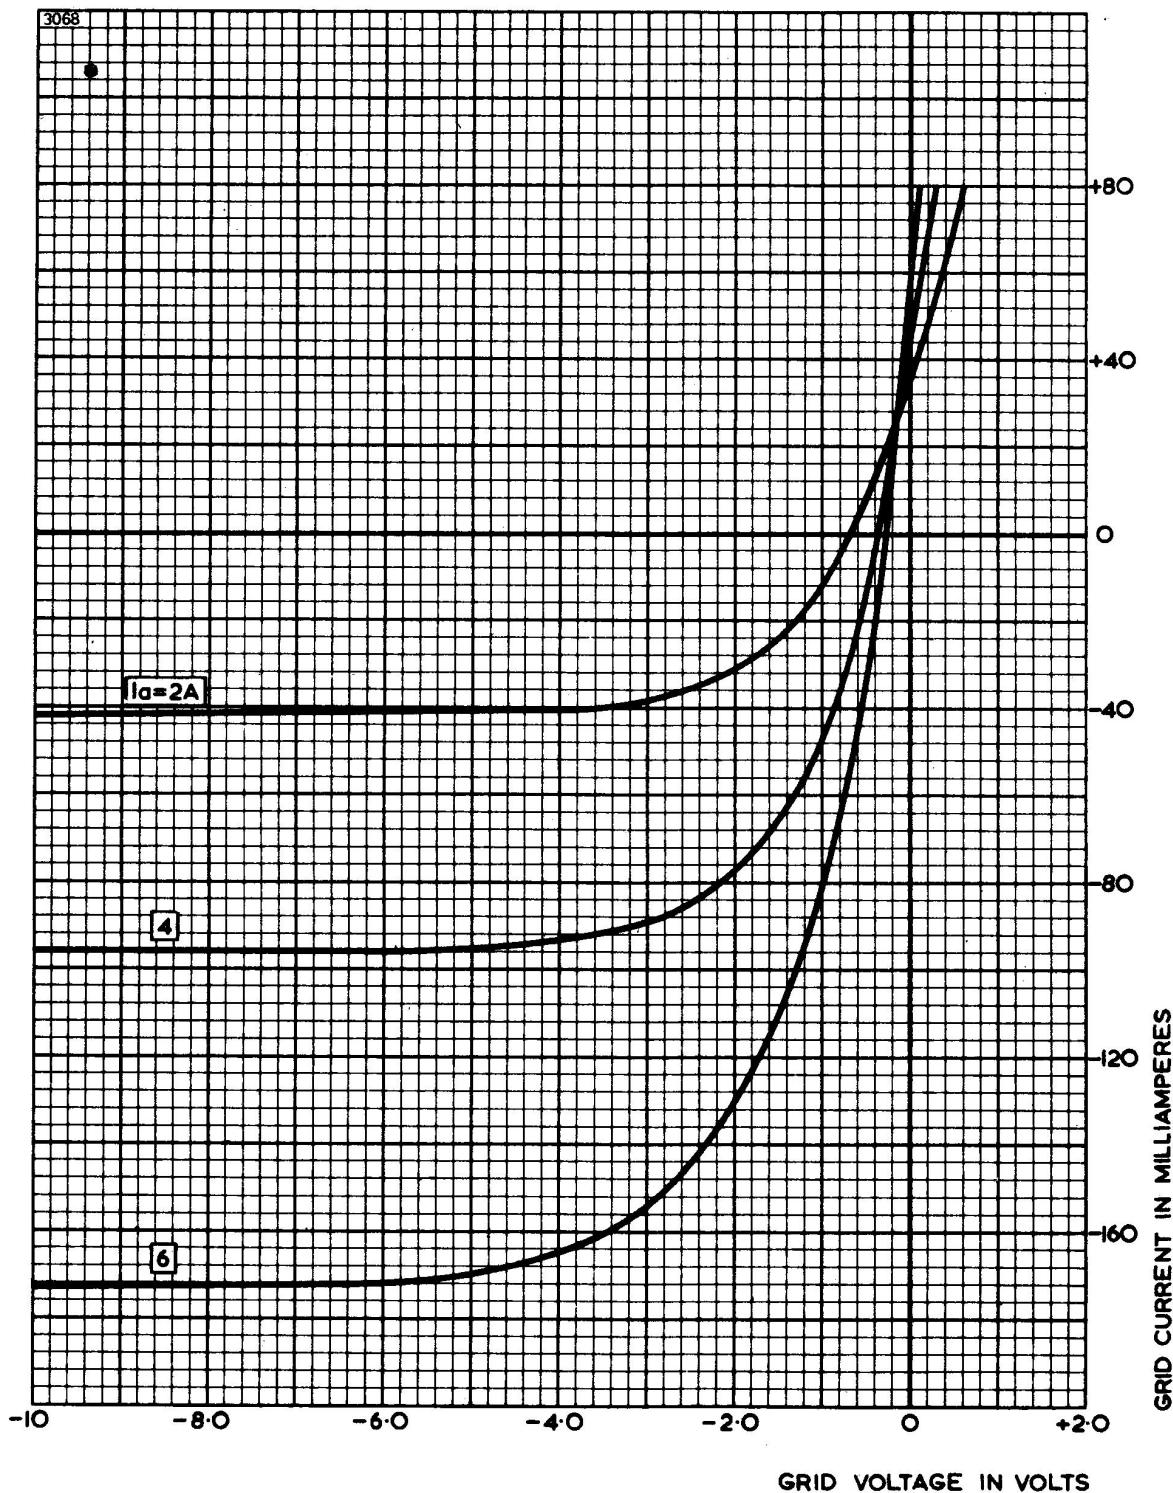

## TYPICAL HEATING CHARACTERISTIC

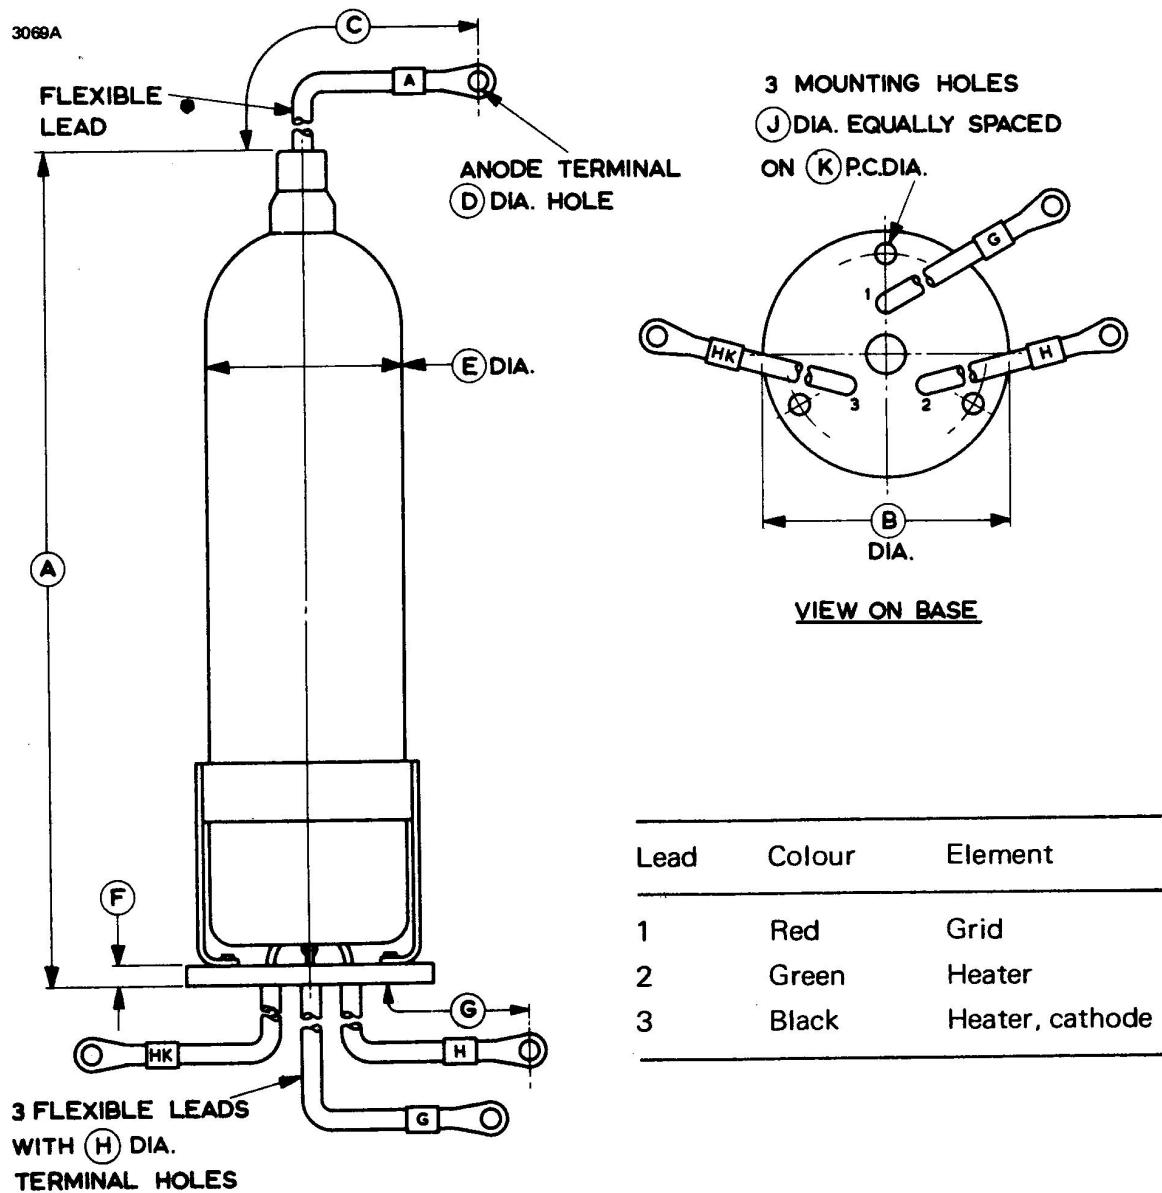

## CONTROL CHARACTERISTIC

## TYPICAL GRID CURRENT CHARACTERISTICS

## OUTLINE (All dimensions without limits are nominal)

| Ref | Inches             | Millimetres     |
|-----|--------------------|-----------------|
| A   | $10.000 \pm 0.250$ | $254.0 \pm 6.4$ |
| B   | 3.157 max          | 80.19 max       |
| C   | $6.500 \pm 0.250$  | $165.1 \pm 6.4$ |
| D   | 0.265              | 6.73            |
| E   | 2.500              | 63.5            |

| Ref | Inches            | Millimetres       |
|-----|-------------------|-------------------|
| F   | 0.250             | 6.35              |
| G   | $7.500 \pm 0.250$ | $190.5 \pm 6.4$   |
| H   | 0.266             | 6.76              |
| J   | $0.250 \pm 0.002$ | $6.350 \pm 0.051$ |
| K   | $2.625 \pm 0.010$ | $66.68 \pm 0.25$  |

Millimetre dimensions have been derived from inches.
